## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 & 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Monagan (5,601,786) and Reidy (5,203,989). Monagan discloses an air quality purifying system and comprising: an air purifier (10) and at least one UV lamp (40) light source. Monagan lacks a switch that controls one HVAC component, however Reidy teaches a ultraviolet light consisting of a switch that controls at least one HVAC control. It would be obvious to one of ordinary skill in the art at the time the invention was made to modify and/or provide the apparatus of Monagan with a switch for controlling at least one HVAC control as taught by Reidy for the purpose of preventing component damage and system failure.

### ***Allowable Subject Matter***

Claims 2-7 & 9-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
